DIMENSIONS (CM) h 210 / w 50 / l 50
MATERIALS concrete / metal / blown glass
EDITION edition of 8
LEAD TIME 4-8 weeks
FINISH varnish matte
COLOR OF EPOXY -

At the intersection of art and functionality, we have come together to redefine furniture design. Our project blends the principles of sculpture with the practicality of everyday furniture, creating pieces that are both artistic and highly functional.

With years of experience working with wood, epoxy resin, and other materials, we have mastered their properties and possibilities. But we are not here to stay within the boundaries of what is already known—we want to take things to the next level. Our goal is to push the limits of material, form, and perception, creating pieces that challenge expectations and engage all the senses.

Our philosophy is rooted in the belief that products should not only be visually striking but also possess distinctive qualities that enhance their usability. We strive to craft designs that are not just complete in form but also entirely unique.

To achieve this uniqueness, we work extensively with epoxy resin, a material that offers endless possibilities for combining colors, textures, and materials. Each piece is meticulously handcrafted—our combined expertise in sculpture, woodworking, and resin artistry ensures the highest level of craftsmanship and quality.

MODERN MINIMALISM

BRUTALISM
